

Are you a student enrolled in a Sciences or Health Sciences major? Are you interested in a career in the Sciences? Do you enjoy doing research and learning new things? Do you like working with people? Would you like to work alongside fun librarians to learn about what we do?

**A Science  
Information  
Internship is all this  
and more!**

### Requirements:

Interested undergraduate students should be enrolled in a science-related major or minor at Brooklyn College and be available for 6 hours total during the school week.

### How to apply:

Please submit your resume and a brief cover letter detailing your reasons for interest in the internship. In your letter, please list your status, major/minor and any sciences courses you have taken. Submit your application via email to Prof. Matthew Harrick or Prof. Lee Ann Fullington.

**Applications for Fall 2015 are due  
by August 15th.**

## **Science Information Internship for STEM and Health Sciences**

# What is the Science Information Internship all about?

## Adaptive

The content of the internship reflects your interests. Choose from modules for Health Sciences, Data, Science, Engineering Natural Sciences, and more.

## Flexible

The internship is on campus at the Library and you can arrange your hours to fit with your classes and other commitments.

## Unique

You'll work one on one with librarians and have hands on opportunities across many facets of librarianship. You'll learn skills that will help you with your studies now and in the future.

## Fun

Field trips that match your interests! Friendly librarians will guide you and you'll make great connections with fantastic people!

The Brooklyn College Library actively seeks to encourage undergraduate Brooklyn College science students to consider science librarianship as a career. We offer a special science librarianship-related internship to expose interested students to the profession. Interns will shadow librarians at the reference desk, visit Library units, and attend meetings and observe information literacy instruction sessions.

In addition, there is more emphasis on the unique nature of science librarianship: interns will work on semester-long projects, visit other science-related libraries in the NYC metro area, work closely with Brooklyn College science librarian faculty, and participate in local science special interest groups.
